**FLUSH MOUNTED FUSE BOX
TECHNICAL DATA SHEET**

SPECIFICATIONS

- Raw Material: ABS
- Quality Standard: EN 61439-1, EN 61439-2
- Color: RAL 9010
- Operating Temperature: -15°C / +60°C
- Door Opening Angle: 180°
- Protection Class: IP40
- Fire Resistance: Up to 650 °C
- Insulating Class: Class II
- Circuit Breaker Rail: Galvanised Steel

SIZES

- Rustproof, no need painting and maintenance.
- Dielectric, safety
- Flameproof, self-extinguishing.
- Resistant to atmosphere conditions.
- Wide internal space, selected designs.
- Resistant to heat and impact.
- Equipped with earthing and installation accessories.
- Installation of insulated earthing is optional.
- Halogen free type is optional.
- Easy installation.

FLUSH MOUNTED FUSE BOXES

-Fuse Boxes are a type of electrical service panel that houses fuses instead of circuit breakers. Each fuse connects to a separate circuit in the building, providing overcurrent protection to prevent electrical fires.
