**LIGHT SERIES HALOGEN FREE NON-FLAMMABLE COIL PIPES
TECHNICAL DATA SHEET**

SPECIFICATIONS

- Compression Resistance: 320N
- Impact Resistance: 2 kg.
- Min. Operation Temperatur: – 15°C
- Max. Operation Temperature +60°C

SIZES

SIZE	Inside mm Ø	Outside mm Ø	Packing (mt.)
14	11	14	100
16	13	16	250
18	15	18	200
20	16,6	20	150
25	20,8	25	100
32	26,4	32	100
40	34	40	100
50	43,6	50	100
63	56	63	50

USAGE AREAS

Where there is not much external pressure and mechanical forces Where there is, in buildings, residences, prefabricated structures, In all flush-mounted and surface-mounted applications, concrete inside, plasterboard, wall or suspended ceiling The formation of halogen and acid gas is undesirable Used in all structures, prevents the spread of flame and the gas released does not adversely affect human health. It is resistant to breakage, crushing and impacts. It is produced in coil form and is also airy. Convenience in cable pulling due to production, such as labor savings and minimal use of additional parts It provides many advantages. TS EN 61386-22 It is produced in accordance with the standard.
